Notes: This is a first-pass attempt to combine and format the data from Prime Directive.

Ultimately, I want to include more notes, such as SFB and FC scenario numbers where applicable.

I am trying to standardize the terminology. Major/Minor planet/system should only be used to refer to planets marked that way on the F&E map. The others are colonies or minor colonies.

Where data is known, colonies may be sub-categorized as mining, agricultural, or whatever.

Anybody with an F&E LSM is welcome to provide data from that map via the BBS topic.
