

STARLINE 2300 MINIATURES

=====

This is a list of the Starline 2300 minis, at least, the best that we can reconstruct from memory and fragmentary records. If you have better information, please email (design@StarFleetGames.com). **List updated 6 March 2010.**

=====

Starbase: The Starline 2300 starbase had the docking modules and ring as six separate parts.

Battle Station: The Starline 2300 battlestation was used (with some parts combined) as the 2400 base station.

Large Freighter: A few were made and sold in 2300. The 2400 ship is more or less identical.

Small Freighter: many were made and sold in 2300. The 2400 ship is more or less identical.

=====

FEDERATION

Fed Dreadnought (Zocchi Plastic): identical in 2200 and 2400.

Fed Dreadnought (Zocchi Plastic-Clear plastic): identical in 2200 and 2400.

Fed Heavy Cruiser (CA) (Zocchi Plastic): identical in 2200 and 2400.

Fed Heavy Cruiser (CA) (Zocchi Plastic-Cloaked): identical in 2200 and 2400.

Fed Heavy Cruiser (CA): There was a metal one (two parts) sold briefly but it wasn't very good.

Fed Old CL: The 2300 old CL had separate engines. These were made part of the hull in 2400

Fed Scout+Destroyer (Zocchi Plastic): identical in 2200 and 2400.

Fed Tug (Zocchi Plastic): identical in 2200 and 2400.

Fed Tug (Cloaked): identical in 2200 and 2400.

Fed Frigate: The 2300 series had separate trapezoidal engines, changed to attached cylindrical engines in 2400.

Fed NCL: The 2300 series had separate engines that were too small. Correct sized engines are cast as part of the hull in 2400.

Fed CVA: The original design for 2300 was released as the Operational Carrier CVO in 2400

=====

KLINGONS

Klingon C8 Dreadnought: the 2300 design had separate engines. These were attached in 2400.

Klingon D7: the 2300 design had separate engines. These were attached in 2400. There was a once-piece D7 sold briefly under 2300 but it was too thin and bent too easily.

Klingon F5: The 2300 design was too small and was modified for use as the E4 in 2400.

Klingon T7 Tug: the 2300 design had separate engines. These were attached in 2400.

Klingon Cargo Pod

Klingon B10 Battleship: the 2300 design had a lot of parts. The number of parts was reduced in 2400 by combining some.

Klingon D5 War Cruiser: the 2300 design had separate engines. These were attached in 2400

=====

ROMULANS

Romulan War Eagle: There were several versions of this ship done for 2300; a new design was used for 2400. One of the 2300 designs was modified to become the 2400 Battle Hawk.

Romulan Snipe: more or less identical to 2400

Romulan Condor: more or less identical to 2400

Romulan SparrowHawk: the 2300 design had separate engines. Two of these were attached in 2400.

Romulan FireHawk: The 2300 design had separate bottom engines. These were attached in 2400. Very few 2300s were sold.

Romulan SkyHawk: more or less identical to 2400

Romulan SeaHawk: more or less identical to 2400

=====

KZINTIS

Kzinti Battlecruiser: The 2200 had 14 parts (later reduced to 12, then 10), the 2300 had four, and the 2400 has only two.

Kzinti CVE (CL): The 2200 had 14 parts (later cut to 10), the 2300 had six, and the 2400 has only two.

Kzinti Medium Cruiser: The 2300 had four parts (separate engines), and the 2400 has only two parts.

Kzinti Dreadnought The 2300 had many parts (separate engines and wings), and the 2400 has only two parts.

Kzinti Heavy Battlecruiser (CVS) The 2300 had 6 parts (separate engines and wings), and the 2400 has only 2 parts.

Kzinti Frigate: The 2300 had six parts (separate engines and wings), and the 2400 has only two parts.

Kzinti Tug: more or less identical to 2400

=====

GORNS

Gorn Light Cruiser: The 2300 had separate engines, and the 2400 ship is one piece.

Gorn Destroyer: The 2300 had separate engines, and the 2400 ship is one piece.

Gorn Dreadnought: The 2300 had separate engines, and the 2400 ship is one piece.

Gorn Battlecruiser: The 2300 had separate engines, and the 2400 ship is one piece.

=====

THOLIANS

Tholian PC: Two different versions were marketed. The one with straight wings is now the 2400 PC while the one with wedge-shaped wings is the 2400 DD.

Tholian CA: more or less identical to 2400

Tholian DN: more or less identical to 2400

Neo-Tholian DN: more or less identical to 2400

Neo-Tholian CA: more or less identical to 2400

=====

ORIONS

Orion Raider Cruiser: more or less identical to 2400

Orion Salvage Cruiser: more or less identical to 2400

Orion Slaver: This very large ship became smaller and more in scale in 2400.

=====

HYDRANS

Hydran Ranger Cruiser: The 2300 mini had a separate top engine; this is cast as part of the hull in 2400.

Hydran Destroyer: more or less identical to 2400

Hydran Paladin Dreadnought: more or less identical to 2400

Hydran Hunter Frigate: more or less identical to 2400

Hydran War Cruiser: this ship has two weapons in 2300 and three in 2400.

=====

ANDROMEDANS

Andromedan Intruder: more or less identical to 2400

Andromedan satellite ships: more or less identical to 2400

Andromedan Conquistador: more or less identical to 2400

Andromedan Python: more or less identical to 2400

=====

LYRANS

Lyran Lion Dreadnought: The 2300 had separate outer engines, made part of the hull in 2400.

Lyran Tiger Heavy Cruiser: The 2300 had separate outer engines, made part of the hull in 2400.

Lyran War Cruiser: This was out of scale and became the 2400 DW.

Lyran Destroyer: This was out of scale and became the 2400 FF.

=====

ISC

ISC Dreadnought: more or less identical to 2400

ISC Heavy Cruiser: more or less identical to 2400

ISC Destroyer: more or less identical to 2400

ISC Frigate: more or less identical to 2400
