

Module C5 Errata, last updated 10 Feb 2010:

Due to a glitch in PageMaker, many SSDs were not updated prior to printing the first copies. This produced a lot of minor technical errors. New errata items are indicated by Italicized rule numbers, but many of these are simply cross references and repeats, i.e., confirming that a contradiction between the SSD and the MSC is resolved one way.

Thanks to Frank Brooks for his efforts at compiling the new items.
