

## MODULE R11 AFTER ACTION REPORT

As of 6 January 2008. Copyright © 2008 ADB, Inc.

(R1.82) Rule: This unit cannot use skids or ducktails.

(R1.83) Rule: First paragraph: The word "was" in "more effective enemy warships was soon overwhelmed" can be deleted. The Weapon C/D column for the Romulans in the weapon chart should be "Plas-F-LP/RP" instead of "Plas-F-LP/RR".

(R1.84) Rule: Sixth paragraph: The word "cutter" in "their own defense cutter" should probably be "carrier".

(R1.85) Rule: Sixth paragraph: The word "to" should be added between "due" and "lack" in "on the SSD due lack of space".

(R1.86) Rule: Second paragraph: The word "he" in "Cutters operated by he Klingons" should be "the".

(R2.133) Steve Cole noted that picture is just artwork and even he is not sure how the Feds actually carried the F-111s.

(R2.134) Rule: The graphic shows the ship with F-111s docked when they should be A-20s.

(R2.140) Rule: In the second paragraph "Stuart" was erroneously spelled "Stewart".

(R3.155) Rule: First paragraph: The word "but" in "are inactive but and every box" should be deleted.

(R4.128) Rule: Escort/Fighter Chart: The Year in the first row should have a "Y" to be consistent with the other rows.

(R4.129) Rule: Third paragraph. "No transfers" is listed twice in this paragraph. SSD: Fighters #13 and #14 erroneously have PI-F torpedo check-off boxes.

(R4.131) Rule: First paragraph: The word "was" should be added between the close paren and "put" in "complete design study) put".

(R4.132) Rule: First paragraph: The word "to" should be added between "not" and "go" in "the Romulans decided not go ahead".

(R4.133) Rule: First paragraph: The word "of" should be added between "need" and "a" in "found themselves in need a small transport".

(R5.106) Rule: Escort/Fighter Chart: The Year in the first row should have a "Y" to be consistent with the other rows.

(R5.113) Rule: First paragraph: The word "the" should be added between "of" and "General" in "during the final years of General War".

(R7.56) The BPV of this unit should 100/75.

(R7.57) Rule: Escort/Fighter Chart: The "p" in "Sp-II" and "Sp-III" can be removed to make these consistent with the listings for other ships.

(R7.58) Rule: First paragraph: The word "the" should be added between "to" and "defense" in "to come to defense of the Dyson Sphere". The phaser-2s on the base hull were not increased to phaser-1 because this unit was never intended as anything but a relatively static defensive unit.

(R7.59) Rule: Third paragraph. "HWT" should be "LWT".

(R10.0) Andromedan Monitor background: Fifth paragraph: The comma in "part of the battle force, they are not" should be changed to a semi-colon. Fourth paragraph: The word "an" in "only provide mines to an mobile mine platform" should be "a".

(R11.92) Rule: Fourth paragraph: The word "refit" in "mech link refit" should be deleted since "refits" is used later.

(R11.95) Proposed class name for the Lyran NCV - Siberian Jaguar (has not been used yet, so why not).

(R11.96) Proposed class name for the Lyran NSC - Oncilla (same genus as the Margay and Ocelot).

(R11.97) Proposed class name for the Lyran NTG - Catamount (variation of 'Cougar/Puma' as the ship could handle Lyran pallets).

(R12.PF7) Rule: First paragraph: The word "manufactures" should be "manufacturers".

(R13.87) Rule: First paragraph: The word "a" should be added between "as" and "special" in "but as special reserve ship".

(R17.38) Rule: Many were confused by this ship due to the already existing Vudar DWP, but the ship's background explains the situation.

(SG85.2) Colony setup: The word "Tthis" should be "This".

(SG85.45) Last paragraph: The period at the end of the last sentence should be inside the close paren.

(SG85.46) First paragraph: The word "fFreighter" should be "Freighter". The word "have" in "small freighters that have are using skids" should be deleted.

(SG85.49) Objective #5: The text "when they exit the map, the Colony player" should be "when they exit the map. The Colony player" (i.e., make a new sentence).

(SG85.63) This should say to increase the Raider to 220 BPV.

(SH240.2) Federation ADW setup: The word "arrives" should be "arrive". The word "with" should be "within".

(SH240.471) The damage listed in this rule is only applied to the fighters.

(SH240.73) The word "the" in "starting damage on the some" should be deleted.

(SH241.61) The word "the" in "DWPs of the one or both sides" should be deleted.

(SH241.63) The word "valkyrie" in "Each valkyrie will have" should be capitalized.

(SH242.0) First paragraph: The word "option" in "preparations for a major option" should be "operation". The word "to" should be added between "was" and "be" in "the X-squadron that was be the spearhead".

(SH242.422) There should be a space between "the" and "F-18Bs" in "and one of theF-18Bs".

(SH242.8) Coalition Tactics: The comma in "both their drone throw weight, and their ability" can be deleted.

(SH243.0) Fourth paragraph: The word "Once" should be "One".

(SH243.2) Klingon setup: The F5 does have the "B" refit.

(SH243.63) The word "be" should be added between "to" and "loaded" in "will have to loaded in order".

(SH243.X) HISTORICAL OUTCOME: The Hydran Tug disengaged with the combat pallet after being badly damaged. The *Swift-Sender* covered the Tug's retreat and was destroyed. Both Klingon ships sustained heavy damage.

(SH244.8) Orion Tactics: The word "a" should be added between "of" and "hornet's" in "close range of hornet's nest".

(Z38.4) Light PFTs only rarely operated PFLs or PFS type PFs. There were too few of the former, and the latter were not that useful if you were not operating a full flotilla. Still, it was always possible that a given Light tender might have either, or both of these PF types, and on special missions might have virtually any PF type as any other PF tender. The Exception that proved the rule was the Romulan Chickenhawk series which often operated two ships as a group to carry a full standard flotilla. Other races were not known to have done this on a regular basis.

Annex #3 (R1.68I) Search and Rescue Skid: MSC Notes should show diamond scout symbol.

Annex #3 (R1.68R) SCIS: Science Skid: MSC Notes should show diamond scout symbol.

Annex #3 (R1.68X) WBS Skid: YIS should be Y184.

Annex #3 (R1.68Y) PFS Skid: YIS should be N-PF.

Annex #3 (R1.PF7) Workboat: Should have "N" for nimble in notes column, but this was noted in Annex #7F.

Annex #3: (R2.136) Federation P-HVL: Spare shuttle should be "O+1H".

Annex #3 (R2.142) MSC lists warship status of LP2 when the rule says four were built, so LP2 should be changed to LP4.

Annex #3(R1.69A3) S-WT Ducktail: YIS should be Y184.

Annex #3(R1.69B3) L-WT Ducktail: YIS should be Y184.

Annex #3: (R6.97) Gorn SP: Should be "P-SC".

Annex #3: (R6.99) Gorn PTP: Should be "P-TP".

Annex #3: (R9.119) Hydran SP: Should be "P-SC".

Annex #3: (R9.120) Hydran VHP: Should be "P-CR".

Annex #3: (R9.121) Hydran PTP: Should be "P-PT".

Annex #3: (R12.51) WYN DSC: Should be "DCS".

Annex #3: (R14.47) LDR MPP: The Move Cost column should be "0.50" to be consistent with the other entries in the chart.

Annex #3: General Note: The note "F" is used in the notes column to designate a "Fast" raiding ship.

Annex #10: Klingon: The "DV" on the "D7" line should be "DV†".

Annex #10: Hydran: The "DM" line (with the HUN) should be "CM".

Perspective Workboats: Seventh paragraph: The close paren in "maintain, not increase, gunboat strength" should be deleted. Tenth paragraph: The word "mean" in "mech link mean building a gunboat" should be "meant".

Perspective: Civilian Mission Ships: Sixth paragraph: There should be a "/" between the "and" and "or" in "shuttle, power, and or mining skids".

Perspective: Scout Pods: Third paragraph: The word "provie" in "could provie true scouts" should be "provide".

Rule Book: Table of Contents: The Perspective information for Division Control Ships and Scout Pods is on page #40, not page #39. The WYN Fast War Cruiser (R12.52) and Division Control Ship (R12.51) are listed backwards. Note it is just the ship names. The rules numbers are correct for the pages listed.
