

F5 Frigate

100 POINTS

A strange ship, the F5 Frigate is either the largest frigate in the galaxy or the smallest destroyer. Manoeuvrable and quick, it is used for raids and counter-raids, along with a host of small ship missions such as convoy escort, patrol and reconnaissance.

D6 Heavy Cruiser

150 POINTS

The first 'modern' Klingon cruiser, the D6 was later replaced by the D7 (which had more power and two extra phasers). The D6 had been built in such huge numbers, however, that the Klingons did not need to spend money on light cruisers to stretch the cruiser force a little further; they could simply use the D6. Dozens of D6 hulls were in storage (ready to be activated by reserve crews in time of war) and some were sold to the Romulans who refitted them with cloaks and Romulan weapons.
