Editor’s Notes, 4 April 14 Edition

This list is not complete and a few products have never had their ship name data imported into it. Players are welcome to send to ADB their comments, reports, additions, and corrections for this listing. To be used, they must be in the following specific format: [NAME] (the name of the ship) [PRODUCT] (the specific product in which it is printed) [PAGE] the page number in that product. If you notice that an entire product is missing (for example, Module R9) then do not do line items, just tell us what products are missing and we will do them the normal way.

I am fully aware that there are a lot of "format issues" (things in various point sizes, bold or not, italic or not, all caps or not, spelled out or not) and do not plan to waste time on these (at least now). So you don’t need to waste your time giving me a list of things which need to be in different point sizes or upper case or lower case or whatever. The point of this document is to get information into the hands of players, and since we’re not changing money for it, we cannot afford to spend employee time fixing such things (as they have no bearing on the information, they just make it look pretty).

You are welcome to submit new ship names, marking those that you actually use in your campaigns (and any special requests) so that we can accommodate these if possible. If you are suggesting that a ship be named for a historical person or ship, include biographical and reference data to confirm the proposal.

For the most part, X-ship names are not included. These were all in Module X1, and until I have time to dig them out of the backup disks, that list will have to serve.

If there are more names than there should be, assume that the extras are replacements or ships never built.

It is not unusual for two or more races to each give a ship the same name.

NOTE: This is the revised edition of the list, including everything to date, unless we forgot something. Whenever we finish a product, we assign the ship names during the very last day of editing the manuscript and update the historical records at that point.

ORION SHIP NAMES

There are numerous problems in compiling a list of pirate ships, the lack of cooperation from the Orions (Oh-rye-uhns) being the most significant. The constantly shifting “borders” of the pirate territories and the constantly changing affiliations of the 65% of the ships owned solely by their captains makes compiling a list even more difficult.

As is explained in the SFB rules, various pirate cartels operated within loosely defined territories. Theoretically, each cartel had the exclusive rights to piracy and smuggling operations within those territories, and the cartel Crimelord assigned separate areas within his territory to various ships (some he owned, others he did not). All of this was subject to change without notice.

The list includes pirate vessels known to be operating during the General War. Some ships changed names, and some destroyed ships were replaced by ships of the same or different names. These are by no means all of the pirate ships, nor does the list include every ship controlled by a given Crimelord. Due to tactical arrangements, losses in action, and units spending their profits on shore leave, the actual number of ships any given Crimelord could assemble on short notice would be nowhere near as large as the number of listed names. The list of “Cartel-owned” ships is given twice for convenience of the players.

HYDRAN SHIP NAMES

The numbers given below are not hull or contract numbers, but tactical designators. If cruiser number 201 was destroyed, another ship would be built and given that number. The Hydrans also re-used many ship names, often replacing a lost ship with one of the same name. The records indicate that many wartime scouts and minesweepers, built on Horseman hulls, used the same names as earlier scouts and minesweepers built on Hunter and Lancer hulls. During the later war years, some ships displayed no external hull numbers. These, and various other additional or replacement ships, are also listed.

All are preceded by HMS (Hydran Majesty’s Ship).

LYRAN SHIP NAMES

This list is organized differently than the others, being divided along fleet (rather than ship class) lines, and includes the internal organization of the Lyran Empire. The nobles shown were those in power at the start of the General War. Few survived it. The list below shows the subordinate counties under each Duke.

Feudal systems are organized to support the military. Each county in the Lyran Empire is responsible for the cost of construction and upkeep (and to provide the crews) of about 5% of the total fleet. This usually amounts to one each of the standard classes (CA, CW, CL, DD, DW, FF) plus some of the support units. The ships are deployed within the county, but are (theoretically) available for duty anywhere.

As with other ship lists, this one is neither complete nor absolute. Other names were used, and some ships (and some counties) changed names from time to time. If your favorite county is not listed, simply select another county, stage a coup, and replace them.

Ships have a three-digit hull number showing the clan affiliation. The first number indicates the duchy, and the second indicates the county. The ships of each county were numbered in the order they are listed. These numbers were changed from time to time. Tri-hull conversions kept the same name and number.

NOTES ON FleETS
HOMEWORLD: (King Rahrzahk) (Hull numbers 100-199) (F&E 0408)
   The homeworld was responsible for all ship production of size class 2 or 3 (with the exception of tri-hull conversions of existing FFs, DDs, and CLs which were often done in local yards). Most of these ships were paid for by and sent to the various counties, but a small force was maintained as a strategic reserve.
   The battlecruiser within each duchy was part of the Homeworld fleet under the command of a Marshal loyal only to the King. His purpose was to remind the local Duke of the preeminence of royal power and to act as the King’s agent when required.
   Standard BCs have Homeworld hull numbers; conversions from CLs have the hull number of the owning county. About half of the CWs assigned to county fleets were commanded by Barons loyal to the King.
   Hull Color: Ships of the Homeworld, Foremost, Apex, Silver Moon, Black Claw, and Night Roar counties are painted in a “camouflage” pattern of black, brown, and tan. This pattern obviously provides no concealment in space. It is symbolic of the
earliest organized Lyran armies (thousands of years before space flight), which stained their fur with mud (and later with vegetable dyes) to enhance concealment and identify the factions.

FOREMOST DUCHY (Arch Duke Frinkor) (hull numbers 200-219) (F&E 0707)
APEX COUNTY (Count Leyrafa) (Hull numbers 220-239) (F&E 0306) Original county name was “Swift.” The name was changed after a minor civil war sent the survivors of that county to the WYN Cluster.
SILVER MOON COUNTY (Count Zaob) (Hull numbers 240-259) (F&E 0609). Was Gray Fur County lead by Count Rizzik after the coup of Y181 until restored as Silver Moon by Count Zarab in Y185.
BLACK CLAW COUNTY (Count Kuhla) (Hull numbers 260-279) (F&E 0107)
NIGHT ROAR COUNTY (Count Ktazh Miroov) (Hull numbers 280-299) (F&E 0105)

RED CLAW DUCHY: (Duke Roget) (Hull numbers 700-719) (F&E 0404)
Hull Color: The basic hull color of the Red Claw, Black Stripe, Pelt Hunters, Golden Fang, and Predator clans is tan.
BLACK STRIPE COUNTY (Count Zahn) (Hull numbers 720-739) (F&E 0101)
PELT HUNTERS COUNTY (Count Rzahk) (Hull numbers 740-759) (F&E 0301)
GOLDEN FANG COUNTY (Count Rassk) (Hull numbers 760-779) (F&E 0402)
PREDATOR COUNTY (Count Prekor) (Hull numbers 780-799) (F&E 0604)

FAR STARS DUCHY: (Duke Kadama) (Hull numbers 500-519)
Hull Color: The basic hull color of the Far Stars, Doom Star, and Blood Star clans is medium brown. All are off of the F&E map except part of Blood Star.
DOOM STAR COUNTY (Count Karin) (Hull numbers 520-539)
BLOOD STAR COUNTY (Count Ffarric) (Hull numbers 540-559) (F&E 0103) Notes: This county took its name from a giant red star that was visible from their capitol planet.
NIGHT STAR COUNTY (Count Iblis) (Hull numbers 560-579) Hull Color: The basic hull color of this county is flat black.
DARK STORM COUNTY (Count Rippke) (Hull numbers 580-599) Notes: This county was named for Dark Storm Nebula, which is in their territory. The ship hulls are striped grey-blue/light-gray.

ENEMY’S BLOOD DUchy: (Duke Laarzdah) (Hull numbers 300-319) (F&E 0310) Notes: The base hull color for ships of the Enemy's Blood, White Stripe, Hidden Dagger, and Bloody Claw clans is light gray.
WHITE STRIPE COUNTY (Count Ragha) (Hull numbers 320-339) (F&E 0109) Notes: The ruling family of this county have a stripe of white fur on the top-center of their heads. This is a genetic trait.
HIDDEN DAGGER COUNTY (Count Kleave) (Hull numbers 340-359) (F&E 0312)
BLOODY CLAW COUNTY (Count Nashar) (Hull numbers 360-379) (F&E 0111)
DARK STAR COUNTY: This county became the Lyran Democratic Republic.

† Destroyed before the General War.

WYN SHIP NAMES

The WYNs did not re-use, change, or transfer ship names. WYN ships did not display hull numbers. The names were painted in standard Lyrti (the combined Lyran-Kzinti dialect used as the common language in the cluster) script on both sides of each ship. The auxiliary names were all given female names, although it is unclear if these were the namesakes of figures from history or favored concubines. The names listed are the Federation translations of (or perhaps substitutions for) the original Lyrti names. It is thought that, in the case of the auxiliary cruisers, no more than one ship was in service at any given time with the same first letter, so the list does include several replacements. For example, Francesca was the replacement for the destroyed Felicia. The other auxiliaries were given names with the same first letter for a class, thus all minesweepers started with C, and several were in service at the same time.
Prefix for all ship names is WSFV (WYN Security Force Vessel).

FRIGATES

FRIGATE LEADERS: 01-Ongoing Determination, 02-Final Action, 03-Original Sequel.

FF: The names listed are for frigates built before the ISC began its fleet expansion. After Y180, frigates were built (and after Y184 were lost) so rapidly that tracking individual names is impossible. The ISC treated frigates as attrition units. New recruits had to survive in a frigate to be promoted to a larger ship. Many changed names, and many new frigates adopted the names of ships lost in action. In some cases two or three frigates (in different fleets) simultaneously carried the same name. 26-Asteroid, 02-Aurora, 24-Baryon, 10-Black Hole, 09-Boloid, 03-Cluster, 20-Collapsar, 06-Comet, 29-Eclipse, 12-Electron, 22-Hypermass, 04-Meteor, 28-Moon, 01-Nebula, 05-Neutrino, 23-Neutron, 07-Nova, 19-Nucleon, 16-Planetoid, 25-Positron, 11-Proton, 13-Pulsar, 27-Quark, 18-Quasar, 15-Rings, 14-Satellite, 08-Sun, 17-Supernova, 21-Tachyon; Stellar Magnitude, Orb, Galaxy, Void, Crescent, Helio, Corona, Sunspot, Solar Wind; Moon #7, Nebula #9.
